Soham Mistry

Pune, Maharashtra
+91 8956285029 | mistry.sohamm@gmail.com | linkedin.com/in/soham-mistry | github.com/SohamMistry01

Skills

- **AI/ML**: Machine Learning, Deep Learning, Natural Language Processing, Data Science, Data Analysis
- **Generative AI**: Large Language Models (LLMs), AI Agents, Prompt Engineering, Retrieval Augmented Generation, Embeddings, Vector Databases, Model Context Protocol, LLM Evaluation
- **Programming**: Python, SQL, HTML, CSS, JavaScript
- **Frameworks**: LangChain, LangGraph, FastAPI, Django, Scikit-learn, XGBoost, LightGBM, CatBoost, Tensorflow, PyTorch, CrewAI, Docker, Git/GitHub

Education

Savitribai Phule Pune University **2022 - 2026**
Bachelors in Technology - Computer Engineering *Pune*

- CGPA: 8.44

Experience

Scoreazy EduTech Pvt. Ltd. **Aug 2025 – Present**
AI Engineer *Mumbai (Remote)*

- Architected the startup's flagship mentee-facing web platform using Django, supporting onboarding of 150+ early users.
- Engineered 10+ FastAPI microservices, integrating RAG pipelines, ML workflows and operational APIs, automating business processes and reducing internal manual workload by 50%.
- Led end-to-end mobile development and published the live Android app on the Google Play Store using Flutter.
- Managed database operations, cloud storage, bug fixes & deployment infrastructure, maintaining 99.95%+ uptime.

Projects

JeevanYaan: AI-Powered Career & Wellness Companion | *Django, LangChain, RAG, CatBoost*

- Built a full-stack GenAI platform with 8 AI modules for career guidance & wellness using Django.
- Trained a CatBoost classifier on lifestyle features for mental health prediction (96% F1-score) + LLM expert review.
- Designed agentic workflows with LangGraph: a Search → Scrape → Summarize research pipeline; Map-Reduce fan-out for parallel multi-file processing, and Tavily web-augmented career planning with graceful fallbacks.
- Implemented RAG using FAISS + HuggingFace embeddings for resume analysis, with token-aware chunking, structured JSON parsing and role-based rate limiting, cutting hallucinations by 50% at 100–300ms latency.

PyChamp | *Django, LangGraph, Multi-Agent System*

- Designed a modern developer ecosystem designed to accelerate Python mastery and algorithmic problem-solving.
- Orchestrated a concurrent 3-agent LangGraph pipeline powered by Groq's high-speed LPU inference (400-1000 tps throughput) paired with a sandboxed code execution engine and zero-token offline study notes library.
- Implemented parallel agent orchestration with synchronized state merging and structured Markdown lesson generation.
- Built secure per-user API key isolation, timeout-guarded code execution and 23 passing Django unit tests covering authentication and security vulnerabilities.

Health Insurance Claim Prediction | *Machine Learning, Data Analysis, Data Visualization*

- Built an end-to-end ML system using ensemble regression with 91% accuracy for cost prediction.
- Reduced manual claim assessment time by 40% through automation and predictive modeling.
- Integrated interactive Plotly charts: heatmaps, KDE plots, histograms, scatterplot for detailed insights on dataset.

Achievements

- Winner of Bit-By-ML Kaggle competition 1st Edition, 2026.
- Best Paper Award at 2nd IEEE International Conference on Computing, Communication and Green Engineering 2026.
- Served as Technical Secretary in CESA & Club Lead in CodeHub, leading event management for over 500 students.

Certifications

- Microsoft Certified Azure AI Fundamentals (AI-900)
- Columbia University: Prompt Engineering & Programming with OpenAI
- Udemy: Agentic AI with LangChain and LangGraph
